(University of Washington)

- オンライン被験者実験の参加者はもっと学びたい？参画したい？
- 実験後の自由記述コメントを分析
(手法: Thematic Analysis)
 - 結果→学びたいし、参画したい
- デザイン提案
 - 研究者と被験者のインタラクション
 - フィードバックのカスタマイズ

The screenshot displays a web interface for a thinking style test. At the top, it says "Let's see how you did!" and "What's your thinking style?". Below this is a horizontal scale from "More analytic, rule-based, left-brained thinking style" to "More holistic, intuitive, right-brained thinking style". A blue triangle labeled "United States average" is positioned towards the right, and a red triangle labeled "Your results" is positioned further to the right. Below the scale are social media sharing icons and the text "Share your results!". A blue bar below the scale reads "How did we determine this result?". The text below explains the test's basis in two studies and describes the "Analytic combination" (grouping words by abstract category) and "Holistic combination" (grouping words by function). At the bottom, there is a text input field for "Any other comments or questions?" and a "SUBMIT" button. Three red circles with numbers 1, 2, and 3 are overlaid on the interface to highlight specific elements.
